

# Laurel Clark Earth Camp

## Leadership for a shared planet

## The Power of Perspective

**Earth Camp for Educators** is a NASA-funded program for teachers in which they explore new resources for teaching about the Earth System. These posters were created by Arizona teachers using imagery from Landsat satellites and Google Earth.

A companion program, **Earth Camp for teens** opens eyes and minds to our unique, interdependent and awe-inspiring planet, drawing connections from our homes, to our region, to the globe, and to what we can learn about Earth from space. For more information, see: [desertmuseum.org/earthcamp](http://desertmuseum.org/earthcamp)

**Earth Camp** was conceived to honor the legacy of **Captain Laurel Salton Clark**, a physician, diver, aviator, astronaut, mother, and also a great lover of nature. Laurel's last adventure ended February 1, 2003 over the southern US when she and the Space Shuttle Columbia crew perished during re-entry.

Funding provided by a grant from NASA's Competitive Program for Science Museums and Planetariums
