

## ARIZONA-SONORA DESERT MUSEUM

PLANT CARE INFORMATION

## Little Lemonhead

## Coreocarpus arizonicus

**DESCRIPTION:** Little Lemonhead is a perennial herb that grows loosely to form mounds up to 3 feet tall and 5 feet across. Bright yellow flowers can occur any time of the year, but especially in spring and fall. This species does not seem to have been tried in horticulture, but we have been growing it at the Desert Museum for years. It does well, but is short-lived (~5 years). However, it readily seeds and volunteers. Little Lemonhead is native in Arizona and Sonora, Mexico.

**RECOMMENDED USE:** Good in shade, providing bright flowers. Attracts butterflys.
