PLANT CARE INFORMATION

Sonoran Brittlestem

Mabrya geniculata

DESCRIPTION: New in cultivation. Mounding perennial, found in rocky canyon habitats in Sonoran uplands. Tubular flowers are creamy white and may attract moth pollinators. Blooms spring and summer.

RECOMMENDED USE: Great for patio container or sheltered rock garden

CULTURE:

Hardiness: unknown, tested to upper 20s, with little to no leaf drop.

Sun tolerance: Morning sun, all day filtered

Watering and feeding: Moderate to high

Soil requirements: well drained soil

Pruning: as needed
